

Premier Building Anchors, specializes in the layout, engineering, and installation of safety anchors on buildings, ensuring your structures meet or exceed all applicable safety standards.

Our team has over 75 years of combined experience in the construction and maintenance industry. We understand safety requirements and are committed to providing our clients with the highest level of service.

The impetus behind our venture stems from a noticeable gap in the market. Since the enactment of new OSHA regulations in 2017 about anchors and certified parapet walls, we have observed a growing demand for reliable, knowledgeable and timely anchor inspections and installation services. Notably in 2023, we experienced firsthand the challenges posed by existing anchor companies' inability to meet customer demands promptly.

We aim to offer comprehensive safety anchor installation services that adhere to the highest industry standards, ensuring client satisfaction and compliance with regulatory requirements.

Our services include:

- Professional design & engineering.
- Professional installations.
- Annual visual inspections in compliance with all relevant regulations.
- Load testing and 10-year re-certifications.
- Turn-key solution for all cutting, patching and coordination of any material re-installations. Includes roofing systems, façade work and interior finishing work as required.

We assure top-notch quality through several key measures:

1. High-Quality Materials.
2. Stringent Manufacturing Standards.
3. Thorough Testing.
4. Certifications and Compliance.
5. Customer Satisfaction Guarantee.

SCHEDULE YOUR DESIGN, INSTALLATION, INSPECTION, or RE-CERTIFICATION TODAY!
